## Gross Domestic Product, Second Quarter 2016 (First Preliminary)

### Technical Note:

#### (1) Main Factors of the Revision from the First Preliminary to the Second Preliminary

In the second preliminary, the estimates of demand components of the first preliminary will be revised due to the incorporation of newly available and revised source data. The main items are as follows.

##### <Original Series>

##### ➤ Private Non-residential Investment

###### First Preliminary:

Estimated by using supply-side source data.

###### Second Preliminary:

Estimated by combining the demand- and supply-side estimates. The former is based on “Financial Statements Statistics of Corporations by Industry” (Ministry of Finance), and other sources. The latter is based on the supply-side source data. (Notice that the supply-side estimates will be revised due to the addition and the revision of source data.)

##### ➤ Private Inventory

###### First Preliminary:

As for work-in-progress inventory and materials and supplies inventory, original net increases of both nominal and real series are estimated by ARIMA models used for seasonal adjustment.

###### Second Preliminary:

Work-in-progress inventory and materials and supplies inventory will be estimated based on “Financial Statements Statistics of Corporations by Industry.” (Notice that the estimates of finished goods inventory and wholesale and retail trade inventory will be revised due to the addition and revision of source data.)

##### ➤ Addition and Revision of Source Data

###### First Preliminary:

Missing source data are extrapolated. Preliminary source data are used where final data are not yet available. (In the first preliminary, source data that are available by the release of the third month’s “Balance of Payments (Preliminary)” are incorporated in the estimation to the greatest extent possible.)

###### Second Preliminary:

The extrapolated data at the first preliminary will be replaced by actual source data if available. Revised or retroactively revised source data will be used if available. (In the second preliminary, source data that will be available by the release of the most recent “Financial Statements Statistics of Corporations by Industry” will be incorporated in the estimation to the greatest extent possible.)

### <Seasonally Adjusted Series>

Due to the concurrent seasonal adjustment applied to the newest original series, the seasonally adjusted series will be revised from the first quarter of 1994 to the most recent quarter.

(Reference) Information on mean absolute revision between the First Preliminary and the Second Preliminary estimates

Mean absolute revision of quarterly real GDP growth rate (seasonally adjusted series) between the First Preliminary and the Second Preliminary estimates for each quarter from April-June 2010 <sup>(※1)</sup> to January-March 2016 is 0.17 % points (0.67 % points for annualized rate <sup>(※2)</sup>).

※1 : Since the First Preliminary estimate for this quarter, the method for extrapolation of the demand-side estimates in private non-residential investment was changed to the current one.

※2 : The quarterly growth rate at annual rate refers to the annual growth rate assuming that the growth rate for the quarter continues for four quarters.

## (2) Other Issues

### ➤ Incorporation of the Retroactive Revision in the Basic Source Data

The first preliminary estimates incorporated the following revision in source data in addition to the regular update of source statistics.

Revised source data	Revised periods in the preliminary estimates	Date released	Affected components in the preliminary estimates
Current Survey of Production	From January-March 2014	July 2016	Supply-side estimates
Survey of Selected Service Industries	From January-March 2015	July 2016	Supply-side estimates
Index Numbers of Commodity Prices in Agriculture	From January-March 2015	July 2016	Supply-side estimates Deflators estimates
Corporate Goods Price Index	From January-March 2016	June 2016	Supply-side estimates Deflators estimates

### ➤ Second Quarter 2016 estimates is based on the following method to reflect the influence on the Kumamoto earthquake in 2016.

○ Changes of estimation methods for Quarterly Estimates of GDP of April-June 2016 (July 28, 2016) (in Japanese)

<http://www.esri.cao.go.jp/jp/sna/data/reference1/siryou/2016/pdf/announce20160728.pdf>

- Estimation for changes in private inventories by type in the First Preliminary of April-June 2016

Estimation for changes in private inventories by type (seasonally adjusted series) in the First Preliminary of April-June 2016 is estimated as follows.

(Billions of Chained (2005) Yen)

	2015/ 4-6	7-9	10-12	2016/ 1-3	4-6	Contributions to Changes in Real GDP at 2016/4-6 (%)
changes in private inventories	2644.7	2226.2	1448.8	914.9	748.2	▲0.0
Finished goods	848.1	207.4	171.1	▲ 221.6	▲ 514.2	▲0.1
Work-in-progress	▲ 273.2	▲ 38.6	130.2	▲ 914.8	▲ 126.7	0.2
Materials and supplies	822.5	853.5	296.0	288.0	164.5	▲0.0
Wholesale and retail trade	1196.5	1127.3	832.8	1699.7	1171.4	▲0.1

- Estimation for supply-side estimates and demand-side estimates used in the estimation process of the private non-residential investment in the First Preliminary of April-June 2016

In the First Preliminary of April-June 2016, the rate of changes from the previous quarter for original nominal series of supply-side estimates, used in the estimation process of the private non-residential investment at April-June 2016, is estimated as ▲5.2% with the information used for the supply side basic statistics, also, the rate of changes from the previous quarter for original nominal series of demand-side estimates is estimated as ▲30.9% with the information used for the supply-side estimates.
