# I. On Closing Balance Sheet and National Wealth

Closing balance sheet accounts, compiled by each institutional sector, record assets (both non-financial and financial), liabilities and net worth as a balancing item at the year-end on the basis of market value.

Net worth of total economy is also called 'national wealth'. Since financial assets and liabilities that are cross-held among institutional sectors are offset, national wealth is equal to the sum of non-financial assets and net external assets (i.e. the difference between external assets and external liabilities).
