2. Income Series

(1) Gross Domestic Income (GDI) and Gross National Income (GNI)

Real GDI, derived by adding trading gains and losses to real GDP, increased by 1.3% in FY2017, growing for the third consecutive year, due to the increase in real GDP. Real GNI, derived by adding net income from the rest of the world to real GDI, increased by 1.6%, growing for the sixth consecutive year.

(*1) Trading gains and losses represent the changes in real income (purchasing power) from the changes in terms of trade.

(*2) Net income from the rest of the world = Receipts of income the rest of the world - Payments of income to the rest of the world.
