※2 財貨・サービスの純輸出=財貨・サービスの輸出-財貨・サービスの輸入

Net Exports of Goods & Services = Exports of Goods & Services - Imports of Goods & Services

純輸出の寄与度は輸出と輸入の寄与度の差によって求めている。

The contribution is calculated as the contribution of Exports Less that of Imports.

Gross Domestic Product, First Quarter 2012(Second Preliminary)

Technical Note:

(1) Main Factors Behind the Revision from the First Preliminary to the Second Preliminary

From the first preliminary to the second preliminary, some figures were revised due to the incorporation of newly available and revised source data. The following explains the main revisions in the expenditure series.

<Original Series>

- Private Non-residential Investment [reasons for the revision in January-March 2012, except for the updates of source data]

First Preliminary:

Estimated based on supply-side source data.

Second Preliminary:

Estimated by combining the demand and supply-side estimates. The demand-side estimates were based on “Financial Statements Statistics of Corporations by Industry” (Ministry of Finance: MOF), and other sources.

- Private Inventory [reasons for the revision in January-March 2012, except for the updates of source data]

First Preliminary:

As for work-in-progress inventory and material and supply inventory, original net increases of both nominal and real series were estimated by ARIMA models used for seasonal adjustment.

Second Preliminary:

Work-in-progress inventory and material and supply inventory were estimated based on “Financial Statements Statistics of Corporations by Industry.”

- Addition and revision of source data [reasons for the revisions from January-March 2010]

First Preliminary:

Missing source data were extrapolated. Preliminary source data were used where final data had not yet been available. (In the first preliminary, source data available by the release of the third month’s “Balance of Payments (Preliminary)” were incorporated into

the estimation to the greatest extent possible.)

Second Preliminary:

The extrapolated data at the first preliminary were replaced by actual source data, if available. Revised or retroactively revised source data were used if available. (In the second preliminary, source data that were available by the release of the most recent “Financial Statements Statistics of Corporations by Industry” were incorporated into the estimation to the greatest extent possible.)

<Seasonally Adjusted Series>

Due to the concurrent seasonal adjustment applied to the newest original series, the seasonally adjusted series were revised from the first quarter of 1994 to the most recent quarter.

(2) Other Issues

The second preliminary estimates incorporated the following revision in source data in addition to the regular update of source statistics.

➤ Incorporation of the Retroactive Revision in the Basic Source Data

The revisions in the basic source data were incorporated as follows.

Revised source data	Revised periods in the preliminary estimates	Date released	Affected components in the preliminary estimates
Corporate Goods Price Index	From April-June, 2011	May 2012	Deflators and Supply-side estimates
Monthly Economic Report on Land Infrastructure and Transportation	From October-December 2011	May 2012	Supply-side estimates

➤ Estimation for materials and supplies inventory and work-in-progress inventory in the First Preliminary of April-June, 2012

With the information used for the Second Preliminary of January-March 2012, the difference from the previous period for seasonally adjusted real series of material and supply inventory and work-in-progress inventory in the First Preliminary of April-June 2012 is estimated as (1,086.5 billion yen). (For that estimation, the original series are estimated by ARIMA models used for seasonal adjustment.)

Please be noted that newly available information is added in the estimation of material and supply inventory and work-in-progress inventory in the First Preliminary of April-June 2012.

➤ Changes in Estimation Methods Dealing with the Great East Japan Earthquake

To exclude effects of the Great East Japan Earthquake, estimation methods for “railway transportation (JR and private railway companies)” and “road transportation” were changed in the same way as the first preliminary estimation. (More details were written in the attached document of the first preliminary estimation (in Japanese only).)
