 - Including Direct Purchases in the Domestic Market by Non-Resident Households
- ※4 含む居住者家計の海外での直接購入

Including Direct Purchases Abroad by Resident Households

Gross Domestic Product, Fourth Quarter 2015 (Second Preliminary)

Technical Note:

(1) Main Factors of the Revision from the First Preliminary to the Second Preliminary

In the second preliminary, the estimates of demand components of the first preliminary is revised due to the incorporation of newly available and revised source data. The main items are as follows.

<Original Series>

> Private Non-residential Investment

First Preliminary:

Estimated by using supply-side source data.

Second Preliminary:

Estimated by combining the demand- and supply-side estimates. The former is based on "Financial Statements Statistics of Corporations by Industry" (Ministry of Finance), and other sources. The latter is based on the supply-side source data.

Private Inventory

First Preliminary:

As for work-in-progress inventory and materials and supplies inventory, original net increases of both nominal and real series were estimated by ARIMA models used for seasonal adjustment.

Second Preliminary:

Work-in-progress inventory and materials and supplies inventory are estimated based on "Financial Statements Statistics of Corporations by Industry."

➤ Addition and Revision of Source Data

First Preliminary:

Missing source data were extrapolated. Preliminary source data were used where final data had not yet been available. (In the first preliminary, source data that were available by the release of the third month's "Balance of Payments (Preliminary)" were incorporated in the estimation to the greatest extent possible.)

Second Preliminary:

The extrapolated data at the first preliminary is replaced by actual source data if available. Revised or retroactively revised source data is used if available. (In the second preliminary, source data that is available by the release of the most recent "Financial Statements Statistics of Corporations by Industry" is incorporated in the estimation to the greatest extent possible.)

<Seasonally Adjusted Series>

Due to the concurrent seasonal adjustment applied to the newest original series, the seasonally adjusted series will be revised from the first quarter of 1994 to the most recent quarter.

(2) Other Issues

Estimation for supply-side estimates and demand-side estimates used in the estimation process of the private non-residential investment in the Second Preliminary of October-December 2015

In the Second Preliminary of October-December 2015, the rate of changes from the previous quarter for original nominal series of supply-side estimates, used in the estimation process of the private non-residential investment at October-December 2015, is estimated as $\blacktriangle 8.7\%$ with the information used for the supply side basic statistics, also, the rate of changes from the previous quarter for original nominal series of demand-side estimates is estimated as $\blacktriangle 0.5\%$ using "Financial Statements Statistics of Corporations by Industry" etc..

Estimation for changes in private inventories by type in the Second Preliminary of October-December 2015

Estimation for changes in private inventories by type (seasonally adjusted series) in the Second Preliminary of October-December 2015 is estimated as follows.

| | | | | | (Dillions | of Chameu | (2003) 1611/ |
|--------------------------------|----------------------------|------------------|---------|---------|---------------|-----------|--|
| | | 2014/ | 2015/ | | | | Contributions to |
| | | 10-12 | 1-3 | 4-6 | 7-9 | 10-12 | Changes in Real GDP at 2015/10-12 (%) |
| changes in private inventories | | ▲ 1,782.6 | 1,195.8 | 2,623.1 | 1,808.6 | 1,582.6 | ▲0.0 |
| | Finished goods | 4.4 | ▲303.4 | 730.4 | 260.5 | 240.4 | ▲0.0 |
| | Work-in-progress | ▲ 1,123.8 | ▲216.9 | ▲192.4 | ▲ 63.7 | 282.7 | 0.1 |
| | Materials and supplies | 102.8 | 756.0 | 764.8 | 835.6 | 219.9 | ▲0.1 |
| | Wholesale and retail trade | ▲808.3 | 867.3 | 1,272.0 | 702.6 | 834.6 | 0.0 |

(Billions of Chained (2005) Yen)

Estimation for work-in-progress inventory and materials and supplies inventory in the First Preliminary of January-March 2016

With the information used for the Second Preliminary of October-December 2015, the seasonally adjusted real series of work-in-progress inventory and material and supply inventory in the First Preliminary of January-March 2016 is estimated as $\triangle 52.6$ billion yen (the difference from the previous quarter; $\triangle 345.7$ billion yen) for work-in-process inventory and 19.0 billion yen (the difference from the previous quarter; $\triangle 199.0$ billion yen) for material and supply inventory.

Please be noted that these series are not continuous with the real seasonally adjusted series before October-December 2015 in the Second Preliminary of October-December 2015, since the figures above are estimated by applying seasonal adjustment to the original series including January-March 2016, which are estimated from the ARIMA model. In addition, there is a case in which these estimations about January-March 2016 is revised since the series up to October-December 2015 is revised by the revision such as basic statistics in the First Preliminary of January-March 2016.

Announcement:

➤ The release schedule of the Quarterly GDP (QE)

The first preliminary of January-March, 2016:

8:50 A.M. JST, Wednesday, May 18, 2016.

The second preliminary of January-March, 2016:

8:50 A.M. JST, Wednesday, June 8, 2016.

The first preliminary of April-June, 2016:

8:50 A.M. JST, Monday, August 15, 2016.

The second preliminary of April-June, 2016:

8:50 A.M. JST, Thursday, September 8, 2016.

The first preliminary of July-September, 2016:

8:50 A.M. JST, Monday, November 14, 2016.

The second preliminary of July-September, 2016:

8:50 A.M. JST, Thursday, December 8, 2016.

The first preliminary of October-December, 2016:

8:50 A.M. JST, Monday, February 13, 2017.

The second preliminary of October-December, 2016:

8:50 A.M. JST, Wednesday, March 8, 2017.

The First Preliminary of the Quarterly Estimates of GDP is released within the latest date of the following three; (i)10 working days after the release of "Export (Detailed) of Trade Statistics" (the third month of the reference quarter), (ii)10 working days after the release of "Preliminary Report on Indices of Industrial Production" (the third month of the reference quarter), or (iii)11 working days after the release of the "Consumer Price Index" (the third month of the reference quarter).

The Second Preliminary of the Quarterly Estimates of GDP is released on 5 working days after the release of "Financial Statements Statistics of Corporations by Industry, Quarterly" (the reference quarter).

Regarding the First Preliminary, the above schedule is set under the prospect that "Preliminary Report on Indices of Industrial Production" from March 2016, though the release dates have not yet been announced until now, will be released by the end of the next month of the reference month.

The above schedule may be changed due to, among other possible reasons, changes in the release dates of source statistics.
