Including Direct Purchases Abroad by Resident Households

Gross Domestic Product, Third Quarter 2016 (First Preliminary)

Technical Note:

(1) Main Factors of the Revision from the First Preliminary to the Second Preliminary

In addition to the regular revision from the first preliminary to the second preliminary, the Second Preliminary of July-September 2016 will introduce the System of National Accounts 2008 (SNA2008) along with the benchmark year revision from 2005 to 2011 (** 1) and incorporate the second annual revision for FY2014 and the first annual revision for FY2015.

In the regular revision from the first preliminary to the second preliminary, the estimates of demand components of the first preliminary will be revised due to the incorporation of newly available and revised source data. The main items are as follows.

Economic and Social Research Institute, Cabinet Office Japan (2016, September) "Preview of the Next Benchmark Year Revision in the Japanese National Accounts"

http://www.esri.cao.go.jp/en/sna/data/kakuhou/files/2015/pdf/20160930_2008sna.pdf

<Original Series>

> Private Non-residential Investment

First Preliminary:

Estimated by using supply-side source data.

Second Preliminary:

Estimated by combining the demand- and supply-side estimates. The former is based on "Financial Statements Statistics of Corporations by Industry" (Ministry of Finance), and other sources. The latter is based on the supply-side source data. (Notice that the supply-side estimates will be revised due to the addition and the revision of source data.)

> Private Inventory

First Preliminary:

As for work-in-progress inventory and materials and supplies inventory, original net increases of both nominal and real series are estimated by ARIMA models used for seasonal adjustment.

Second Preliminary:

Work-in-progress inventory and materials and supplies inventory will be estimated based on "Financial Statements Statistics of Corporations by Industry." (Notice that the estimates of finished goods inventory and wholesale and retail trade inventory will be revised due to the addition and revision of source data.)

➤ Addition and Revision of Source Data

First Preliminary:

Missing source data are extrapolated. Preliminary source data are used where final data are not yet available. (In the first preliminary, source data that are available by the

release of the third month's "Balance of Payments (Preliminary)" are incorporated in the estimation to the greatest extent possible.)

Second Preliminary:

The extrapolated data at the first preliminary will be replaced by actual source data if available. Revised or retroactively revised source data will be used if available. (In the second preliminary, source data that will be available by the release of the most recent "Financial Statements Statistics of Corporations by Industry" will be incorporated in the estimation to the greatest extent possible.)

<Seasonally Adjusted Series>

Due to the concurrent seasonal adjustment applied to the newest original series, the seasonally adjusted series will be revised from the first quarter of 1994 to the most recent quarter.

In the Second Preliminary of July-September 2016, the seasonal adjustment model selections and regression variable specifications will be re-estimated based on the annual estimates.

(Reference) Information on mean absolute revision between the First Preliminary and the Second Preliminary estimates

Mean absolute revision of quarterly real GDP growth rate (seasonally adjusted series) between the First Preliminary and the Second Preliminary estimates for each quarter from April-June 2010 (**2) to April-June 2016 is 0.16 % points (0.66 % points for annualized rate (**3)).

- Since the First Preliminary estimate for this quarter, the method for extrapolation of the demand-side estimates in private non-residential investment was changed to the current one.
- ※ 3 : The quarterly growth rate at annual rate refers to the annual growth rate assuming that the growth rate for the quarter
 continues for four quarters.

(2) Other Issues

➤ Incorporation of the Retroactive Revision in the Basic Source Data

In addition to the incorporation of the 2015-base revision of Consumer Price Index, the first preliminary estimates incorporated the following revision in source data in addition to the regular update of source statistics.

Revised source data	Revised periods in the	Date	Affected components in
Revised source data	preliminary estimates	released	the preliminary estimates
Corporate Goods Price Index	From January-March 2015	October	Supply-side estimates
Corporate Goods Frice fildex	Fioni January-Watch 2013	2016	Deflators estimates
Services Producer Price Index	From January-March 2015	September	Supply-side estimates
Services Froducer Frice fildex	Fioni January-Waten 2013	2016	Deflators estimates
Current Survey of Production	From January-March 2015	October	Supply-side estimates
Current Survey of Froduction	140111 January-Water 2015	2016	Suppry-side estimates
Monthly Economic Report of		November	
Land, Infrastructure and	From January-March 2015	2016	Supply-side estimates
Transportation Economics		2010	

Estimation for changes in private inventories by type in the First Preliminary of July-September 2016

Estimation for changes in private inventories by type (seasonally adjusted series) in the First Preliminary of July-September 2016 is estimated as follows.

(Billions of Chained (2005) Yen)

		2015/ 7-9	10-12	2016/ 1-3	4-6	7-9	Contributions to Changes in Real GDP at 2016/7-9 (%)
cł	nanges in private inventories	2252.2	1628.4	1036.6	1410.1	1067.5	▲0.1
	Finished goods	116.9	210.3	▲ 166.0	▲ 421.5	308.4	0.1
	Work-in-progress	▲ 5.5	153.6	▲925.7	48.0	▲200.7	▲0.1
	Materials and supplies	897.2	357.3	318.9	420.6	138.0	▲0.1
	Wholesale and retail trade	1159.4	884.5	1747.0	1305.1	814.7	▲0.1

Estimation for supply-side estimates and demand-side estimates used in the estimation process of the private non-residential investment in the First Preliminary of July-September 2016

In the First Preliminary of July-September 2016, the rate of changes from the previous quarter for original nominal series of supply-side estimates, used in the estimation process of the private non-residential investment at July-September 2016, is estimated as ▲1.2% with the information used for the supply side basic statistics, also, the rate of changes from the previous quarter for original nominal series of demand-side estimates is estimated as 14.3% with the information used for the supply-side estimates.

Announcement:

➤ The release schedule of the Quarterly GDP (QE)

The second preliminary of July-September 2016, along with the FY2015 annual revision of GDP:

8:50 A.M. JST, Thursday, December 8, 2016.

The first preliminary of October-December 2016:

8:50 A.M. JST, Monday, February 13, 2017.

The second preliminary of October-December 2016:

8:50 A.M. JST, Wednesday, March 8, 2017.

The first preliminary of January-March 2017:

8:50 A.M. JST, within the latest date of the following 3; 10 working days after the release of the March 2017 "Export (Detailed) of Trade Statistics", 10 working days after the release of the March 2017 "Preliminary Report on Indices of Industrial Production", or 11 working days after the release of the March 2017 "Consumer Price Index" (The exact release date will be announced 10 days before the release date on the website.)

The second preliminary of January-March 2017:

8:50 A.M. JST, Thursday, June 8, 2017.

The above schedule may be changed due to, among other possible reasons, changes in the release dates of source statistics.
