サービスの輸入 ※4		15.4	2.6	1.0	(-0.0)	6.0	-1.4	(0.1)	Imports of Services ※4

(注) ()内は国内総生産に対する寄与度

Note: The figures in () indicate contributions to changes in GDP

※1 Changes from the previous year

※2 財貨・サービスの純輸出=財貨・サービスの輸出-財貨・サービスの輸入

Net Exports of Goods & Services = Exports of Goods & Services - Imports of Goods & Services

純輸出の寄与度は輸出と輸入の寄与度の差によって求めている。

The contribution is calculated as the contribution of Exports less that of Imports.

※3 含む非居住者家計の国内での直接購入

Including Direct Purchases in the Domestic Market by Non-Resident Households

※4 含む居住者家計の海外での直接購入

Including Direct Purchases Abroad by Resident Households

**Technical Note and Announcement:
Quarterly Estimates of GDP for July-September 2017
(Second Preliminary Estimates)**

Technical Note:

(1) Major Factors of the Revision from the First Preliminary Estimates to the Second Preliminary Estimates

Quarterly Estimates of GDP for July-September 2017 (Second Preliminary Estimates) incorporate the FY2016 Annual Estimates of GDP. Thus the preliminary estimates for FY2016 are replaced as the First Annual Estimates and the estimates for FY2015 are re-estimated as the Second Annual Estimates.

In addition, the regular revision through incorporating newly available source statistics replaces the first preliminary estimates by the second preliminary estimates and its major factors are as follows.

<Original Series>

➤ Private Non-Residential Investment

First Preliminary: Estimates for the latest quarter are based on supply-side source statistics.

Second Preliminary: Estimates for the latest quarter integrate supply-side and demand-side source statistics, since demand-side statistics such as *Quarterly Financial Statements Statistics of Corporations by Industry* (Ministry of Finance) have become available.

➤ Change in Private Inventories

First Preliminary: Estimates of “Materials and Supplies” and “Work-in-Progress” (nominal and real original series) for the latest quarter are provided by time-series projection with the ARIMA model used in the seasonal adjustment.

Second Preliminary: Estimates of “Materials and Supplies” and “Work-in-Progress” for the latest quarter incorporate *Quarterly Financial Statements Statistics of Corporations by Industry*.

➤ Other addition and revision of source statistics

First Preliminary: If any source statistics are not yet available for any months in the latest quarter, extrapolation is conducted. If preliminary figures are available but final figures are not, the former are incorporated. Estimates incorporate source statistics which are available on the day *Balance of Payments (Preliminary)* for the third month of the latest quarter are released.

Second Preliminary: If some source statistics have become available or been replaced by fixed

estimates or revised for some reason, they are updated. Estimates incorporate source statistics which are available on the day *Quarterly Financial Statements Statistics of Corporations by Industry* for the latest quarter are released.

<Seasonally Adjusted Series>

Seasonally adjusted series are revised from January-March 1994 (both nominal and real), since the seasonal adjustment is conducted with the latest estimates of original series updated as above.

The specification for seasonal adjustment such as choice of regressors and selection of ARIMA models are revised along with the incorporation of FY2016 Annual Estimates of GDP (see the supplementary material). The selection of optimal models is conducted under criteria such as Akaike Information Criteria (AIC).

(2) Other Issues

- Supply-side and demand-side estimates in the estimation process of Private Non-Residential Investment in Quarterly Estimates of GDP for July-September 2017 (Second Preliminary Estimates)

In the estimation process of Private Non-Residential Investment for July-September 2017 in Quarterly Estimates of GDP for July-September 2017 (Second Preliminary Estimates), the supply-side estimate of quarter-to-quarter percent change is 10.5% (nominal original series) based on supply-side source statistics and the demand-side estimate of quarter-to-quarter percent change is 15.2% (nominal original series) based on demand-side source statistics such as *Quarterly Financial Statements Statistics of Corporations by Industry*.

- Estimates of change in private inventories by four categories in Quarterly Estimates of GDP for July-September 2017 (Second Preliminary Estimates)

Estimates of change in private inventories by four categories in Quarterly Estimates of GDP for July-September 2017 (Second Preliminary Estimates) are as follows (real seasonally adjusted series, annualized):

(Billions of Chained (2011) Yen)

	2016/ 7-9	10-12	2017/ 1-3	4-6	7-9	Contributions to Change in Real GDP at 2017/7-9 (%)
Change in Private Inventories	-648.8	-1092.7	-1443.0	-1675.2	512.1	0.4
Materials and Supplies	-257.3	-49.1	-1836.3	-375.3	635.6	0.2
Work-in-Progress	-323.5	-114.3	68.1	1.6	256.6	0.0
Finished Goods	-327.8	31.4	217.1	-614.3	-6.4	0.1
Wholesale and Retail Trade	231.3	-922.2	-51.1	-684.6	-299.2	0.1

- Estimates of real seasonally adjusted series of Change in Private Inventories (“Materials and Supplies” and “Work-in-Progress”) in Quarterly Estimates of GDP for October-December 2017 (First Preliminary Estimates)

Change in Private Inventories (“Materials and Supplies” and “Work-in-Progress”, real seasonal adjusted series, annualized) for October-December 2017 are projected as 74.2 billion yen (-617.6 billion yen as quarter-to-quarter difference) for “Materials and Supplies” and 153.0 billion yen (-106.6 billion yen as quarter-to-quarter difference) for “Work-in-Progress”, by the ARIMA model based on the information incorporated in Quarterly Estimates of GDP for July-September 2017 (Second Preliminary Estimates).

It should be noted that those figures are not continuous to the real seasonally adjusted series in Quarterly Estimates of GDP for July-September 2017 (Second Preliminary Estimates) since those are seasonally adjusted up to October-December 2017 after the projection of real original series for October-December 2017 with the ARIMA models. In addition, those figures for October-December 2017 may be revised in Quarterly Estimates of GDP for October-December 2017 (First Preliminary Estimates) since the estimates up to July-September 2017 will be updated by the revision of source statistics etc.

Announcement:

Release Schedule of the Quarterly Estimates of GDP

First Preliminary Estimates for October-December 2017:

8:50 A.M. JST, Wednesday, February 14, 2018.

Second Preliminary Estimates for October-December 2017:

8:50 A.M. JST, Thursday, March 8, 2018.

First Preliminary Estimates for January-March 2018:

8:50 A.M. JST, no later than the latest day of the following three: (a) the day 10 working days after the release of *Preliminary Report on Indices of Industrial Production* for March 2018, (b) the day 10 working days after the release of *Export (Detailed) of Trade Statistics* for March 2018, and (c) the day 11 working days after the release of *Consumer Price Index* for March 2018. (The exact date of release will be announced on the website no later than 10 days before the release date.)

Second Preliminary Estimates for January-March 2018:

8:50 A.M. JST, Friday, June 8, 2018.

The above schedule may be changed due to changes in the release schedule of source statistics etc.

(Supplementary Material) Specifications for Seasonal Adjustment

(i) X12-ARIMA is employed for seasonal adjustment and it allows various specifications such as choice of regressors and selection of ARIMA models. The selection of optimal models is conducted under criteria such as Akaike Information Criteria (AIC).

(ii) While the specifications for seasonal adjustment are reviewed regularly at the timing the Annual Estimates are incorporated, they may also be revised along with other addition and revision of source statistics.

1. Components of GDP (Expenditure Approach)

Series	ARIMA Model Top: Nominal Series Bottom: Real Series	Leap Year Effect	Other Regressors	
			Type	Background
Domestic Final Consumption Expenditure of Households	-	-	-	-
Durable Goods	(111)(111) (111)(111)	×	AO1997.1	Fluctuation due to the consumption tax rate hike
			AO1997.2	
			RP2008.3 -2009.1	Fluctuation due to the global recession from autumn 2008

			LS2014.1	Level shift due to revision of the BOP	
Gross Fixed Capital Formation by Type	-	-	-	-	
Residential Investment	(011)(011) (011)(011)	×	TC2007.4	Temporary change due to amendment of Building Standards Act	
Other Buildings and Structures	(011)(011) (011)(011)	×	n.a.		
Transport Equipment	(111)(211) (111)(211)	×	n.a.		
Other Machinery and Equipment etc.	(112)(011) (112)(011)	×	n.a.		
Intellectual Property Products	(111)(012) (111)(012)	×	n.a.		

(Note)

1. Additive models are specified to series of Change in Inventories and multiplicative models to other serie

2. The specifications are applied from 1994.1 to 2016.4, and parameter MAXLEAD is set to 8 and parameter MAXBACK to 0 for X12-ARIMA.

The following series are intermediate in the process of estimation but necessary to be seasonally adjusted.

Series	ARIMA model	Leap Year Effect	Other Regressors	
			Type	Background
Private Non-Residential Investment: Supply-Side Estimates	(212)(011)	×	n.a.	
Private Non-Residential Investment: Demand-Side Estimates	(010)(112)	×	n.a.	

(Note) The specifications are applied from 1994.1 to 2016.4, and parameter MAXLEAD is set to 8 and parameter MAXBACK to 0 for X12-ARIMA.

2. Compensation of Employees

Series	ARIMA model	Leap Year Effect	Other Regressors	
			Type	Background
Wages and Salaries	(2 1 2)(0 1 0)	×	n.a.	
Employer's social contribution	(2 1 2)(0 1 1)	×	n.a.	

(Note) The specifications are applied from 1994.1 to 2016.4, and parameter MAXLEAD is set to 8 and parameter MAXBACK to 0 for X12-ARIMA.
