**Technical Note and Announcement:
Quarterly Estimates of GDP for April-June 2018
(First Preliminary Estimates)**

Technical Note:

(1) Major Factors of the Revision from the First Preliminary Estimates to the Second Preliminary Estimates

The regular revision through incorporating newly available source statistics replaces the first preliminary estimates by the second preliminary estimates and its major factors are as follows.

<Original Series>

➤ Private Non-Residential Investment

First Preliminary: Estimates for the latest quarter are based on supply-side source statistics.

Second Preliminary: Estimates for the latest quarter integrate supply-side and demand-side source statistics, since demand-side statistics such as *Quarterly Financial Statements Statistics of Corporations by Industry* (Ministry of Finance) have become available. The supply-side estimates are also revised due to addition and revision of source statistics.

➤ Change in Private Inventories

First Preliminary: Estimates of “Materials and Supplies” and “Work-in-Progress” (nominal and real original series) for the latest quarter are provided by time-series projection with the ARIMA model used in the seasonal adjustment.

Second Preliminary: Estimates of “Materials and Supplies” and “Work-in-Progress” for the latest quarter incorporate *Quarterly Financial Statements Statistics of Corporations by Industry*. Estimates of “Finished Goods” and “Wholesale and Retail Trades” are also revised due to revision of source statistics etc.

➤ Other addition and revision of source statistics

First Preliminary: If any source statistics are not yet available for any months in the latest quarter, extrapolation is conducted. If preliminary figures are available but final figures are not, the former are incorporated. Estimates incorporate source statistics which are available on the day *Balance of Payments (Preliminary)* for the third month of the latest quarter are released.

Second Preliminary: If some source statistics have become available or been replaced by fixed estimates or revised for some reason, they are updated. Estimates incorporate source statistics which are available on the day *Quarterly Financial Statements Statistics of Corporations by Industry* for the latest quarter are released.

<Seasonally Adjusted Series>

Seasonally adjusted series are revised from January-March 1994 (both nominal and real), since the seasonal adjustment is conducted with the latest estimates of original series updated as above.

(Note) Mean Absolute revision from the first preliminary estimates to the second preliminary estimates

Mean absolute revision of Quarterly Real GDP Growth Rate (Seasonally Adjusted Series) from the first preliminary estimates to the second preliminary estimates is 0.17% points for the quarters from April-June 2010* to January-March 2018 (0.71% points for annualized rate**).

* Since the first preliminary estimates for this quarter, the method for extrapolation of the demand-side estimates in the estimation process of Private Non-Residential Investment has been changed to the current one.

**The annualized rate is the annual growth rate under the assumption such that the quarterly growth rate in the quarter repeats itself for four quarters.

(2) Other Issues

➤ Incorporation of the retroactive revision of source statistics

In addition to the regular revision of source statistics, the first preliminary estimates incorporate the following revision in source statistics.

| Source Statistics Revised | Periods of Incorporation | Released | Revised Estimates |
|--|--------------------------|-----------|---|
| Current Survey of Production | From January-March 2016 | July 2018 | Supply-side estimates |
| Flow of Funds | From April-June 2016 | June 2018 | FISIM estimates |
| Index Numbers of Commodity Prices in Agriculture | From January-March 2017 | July 2018 | Supply-side estimates Deflator estimates |

➤ Estimates of change in private inventories by four categories in Quarterly Estimates of GDP for April-June 2018 (First Preliminary Estimates)

Estimates of change in private inventories by four categories in Quarterly Estimates of GDP for April-June 2018 (First Preliminary Estimates) are as follows (real seasonally adjusted series, annualized):

(Billions of Chained (2011) Yen)

| | 2017/ 4-6 | 7-9 | 10-12 | 2018/ 1-3 | 4-6 | Contributions to Change in Real GDP at 2018/4-6 (%) |
|-------------------------------|--------------|---------|---------|--------------|--------|---|
| Change in Private Inventories | -1587. 4 | 632. 9 | 1455. 6 | 416. 1 | 644. 4 | 0. 0 |
| Materials and Supplies | -446. 2 | 718. 5 | 881. 7 | -674. 5 | -44. 5 | 0. 1 |
| Work-in-Progress | 115. 9 | 388. 3 | 824. 7 | 912. 9 | 367. 0 | -0. 1 |
| Finished Goods | -615. 9 | 90. 0 | 444. 7 | 400. 2 | 141. 4 | -0. 0 |
| Wholesale and Retail Trade | -648. 7 | -470. 8 | -579. 4 | -234. 9 | 174. 8 | 0. 1 |

- Supply-side and demand-side estimates in the estimation process of Private Non-Residential Investment in Quarterly Estimates of GDP for April-June 2018 (First Preliminary Estimates)

In the estimation process of Private Non-Residential Investment for April-June 2018 in Quarterly Estimates of GDP for April-June 2018 (First Preliminary Estimates), the supply-side estimate of quarter-to-quarter percent change is -13.5% (nominal original series) based on supply-side source statistics and the demand-side estimate of quarter-to-quarter percent change is -30.9% (nominal original series) based on a tentative extrapolation with the information from supply-side estimates.

- Release of additional information

In response to the request to the Cabinet Office for releasing additional information in “Maintaining and Improving the Precision of the Quarterly Estimates of GDP (QE) in the System of National Accounts” (Chairperson’s Summary, Committee on Systematic Improvement of National Accounts, March 22, 2018), from this release, the following data used in the process for estimating Domestic Final Consumption Expenditure of Household and Private Non-Residential Investment are published as reference information (all of them are level estimates of nominal original series):

- Demand-side estimates
- Supply-side estimates
- Common estimate items
