**Technical Note and Announcement:
Quarterly Estimates of GDP for July-September 2018
(First Preliminary Estimates)**

Technical Note:

(1) Major Factors of the Revision from the First Preliminary Estimates to the Second Preliminary Estimates

Quarterly Estimates of GDP for July-September 2018 (Second Preliminary Estimates) will incorporate the FY2017 Annual Estimates of GDP.

In addition, the regular revision through incorporating newly available source statistics replaces the first preliminary estimates by the second preliminary estimates and its major factors are as follows.

<Original Series>

➤ Private Non-Residential Investment

First Preliminary: Estimates for the latest quarter are based on supply-side source statistics.

Second Preliminary: Estimates for the latest quarter integrate supply-side and demand-side source statistics, since demand-side statistics such as *Quarterly Financial Statements Statistics of Corporations by Industry* (Ministry of Finance) have become available. The supply-side estimates are also revised due to addition and revision of source statistics.

➤ Change in Private Inventories

First Preliminary: Estimates of “Materials and Supplies” and “Work-in-Progress” (nominal and real original series) for the latest quarter are provided by time-series projection with the ARIMA model used in the seasonal adjustment.

Second Preliminary: Estimates of “Materials and Supplies” and “Work-in-Progress” for the latest quarter incorporate *Quarterly Financial Statements Statistics of Corporations by Industry*. Estimates of “Finished Goods” and “Wholesale and Retail Trades” are also revised due to revision of source statistics etc.

➤ Other addition and revision of source statistics

First Preliminary: If any source statistics are not yet available for any months in the latest quarter, extrapolation is conducted. If preliminary figures are available but final figures are not, the former are incorporated. Estimates incorporate source statistics which are available on the day *Balance of Payments (Preliminary)* for the third month of the latest quarter are released.

Second Preliminary: If some source statistics have become available or been replaced by fixed estimates or revised for some reason, they are updated. Estimates incorporate source statistics which are available on the day *Quarterly Financial Statements Statistics of Corporations by Industry* for the latest

quarter are released.

<Seasonally Adjusted Series>

Seasonally adjusted series are revised from January-March 1994 (both nominal and real), since the seasonal adjustment is conducted with the latest estimates of original series updated as above.

In the Quarterly Estimates of GDP for July-September 2018 (Second Preliminary Estimates), the specifications for seasonal adjustment such as choice of regressors and selection of ARIMA models will be revised along with the incorporation of FY2017 Annual Estimates of GDP.

(Note) Mean Absolute revision from the first preliminary estimates to the second preliminary estimates

Mean absolute revision of Quarterly Real GDP Growth Rate (Seasonally Adjusted Series) from the first preliminary estimates to the second preliminary estimates is 0.18% points for the quarters from April-June 2010* to April-June 2018 (0.72% points for annualized rate**).

* Since the first preliminary estimates for this quarter, the method for extrapolation of the demand-side estimates in the estimation process of Private Non-Residential Investment has been changed to the current one.

**The annualized rate is the annual growth rate under the assumption such that the quarterly growth rate in the quarter repeats itself for four quarters.

(2) Other Issues

➤ Incorporation of the retroactive revision of source statistics

In addition to the regular revision of source statistics and the methodological change responding to the discontinuity in *Monthly Labour Survey* (see below), the first preliminary estimates incorporate the following revision in source statistics.

Source Statistics Revised	Periods of Incorporation	Released	Revised Estimates
Services Producers Price Index	From April-June 2016	September 2018	Supply-side estimates Deflator estimates
Corporate Goods Price Index	From January-March 2017	September 2018	Supply-side estimates Deflator estimates
Current Survey of Production	From January-March 2017	October 2018	Supply-side estimates

➤ Estimates of change in private inventories by four categories in Quarterly Estimates of GDP for July-September 2018 (First Preliminary Estimates)

Estimates of change in private inventories by four categories in Quarterly Estimates of GDP for July-September 2018 (First Preliminary Estimates) are as follows (real seasonally adjusted series, annualized):

(Billions of Chained (2011) Yen)

	2017/ 7-9	10-12	2018/ 1-3	4-6	7-9	Contributions to Change in Real GDP at 2018/7-9 (%)
Change in Private Inventories	563.7	1642.0	308.8	515.2	126.6	-0.1
Materials and Supplies	761.2	889.3	-748.6	-82.8	-176.6	-0.0
Work-in-Progress	373.6	840.0	914.4	227.3	342.5	0.0
Finished Goods	-121.6	511.5	420.9	100.0	690.1	0.1
Wholesale and Retail Trade	-362.4	-487.2	-290.4	259.1	-699.4	-0.2

- Supply-side and demand-side estimates in the estimation process of Private Non-Residential Investment in Quarterly Estimates of GDP for July-September 2018 (First Preliminary Estimates)

In the estimation process of Private Non-Residential Investment for July-September 2018 in Quarterly Estimates of GDP for July-September 2018 (First Preliminary Estimates), the supply-side estimate of quarter-to-quarter percent change is 7.4% (nominal original series) based on supply-side source statistics and the demand-side estimate of quarter-to-quarter percent change is 13.4% (nominal original series) based on a tentative extrapolation with the information from supply-side estimates.

- Methodological change responding to the discontinuity in *Monthly Labour Survey*

Since January 2018, *Monthly Labour Survey* (Ministry of Health, Labour and Welfare) has introduced rotation sampling and other methodological changes, resulting in a discontinuity in the data before and since January 2018. In response to the discontinuity, the estimation methods for Compensation of Employees and others are partially changed and hence this release contains revisions in Compensation of Employees from July-September 2009 to April-June 2018 and in Deflators from January-March 2018 to April-June 2018.

Announcement:

Release Schedule of the Quarterly Estimates of GDP

Second Preliminary Estimates for July-September 2018:

8:50 A.M. JST, Monday, December 10, 2018.

First Preliminary Estimates for October-December 2018:

8:50 A.M. JST, Thursday, February 14, 2019.

Second Preliminary Estimates for October-December 2018:

8:50 A.M. JST, Friday, March 8, 2019.

First Preliminary Estimates for January-March 2019:

8:50 A.M. JST, no later than the later day of the following two: (a) the day 10 working days after the release of *Preliminary Report on Indices of Industrial Production* for March 2019 and (b) the day 10 working days after the release of *Export (Detailed) of Trade Statistics* for March 2019. (The exact date of release will be announced on the website no later than 10 days before the release date.)

Second Preliminary Estimates for January-March 2019:

8:50 A.M. JST, Monday, June 10, 2019.

The above schedule may be changed due to changes in the release schedule of source statistics etc.
