

# What is the GNH Index?

- A composite statistic to measure Bhutan's progress in enhancing the happiness of the people based on a holistic framework made up of 9 domains and 33 indicators
- The GNH Index, its domains and indicators will be used to guide Bhutan's development :
  - draw attention to areas that need to be addressed, basis for resource allocation etc.
  - mainstream GNH into new policies & plans by screening the policies using the Policy/Project Screening Tools (PST)
